Key

Height (m)

Tree height estimated in metres

Branch Spread (m)

Estimated average diameter crown spread in metres unless measurements are given on the four cardinal points of the compass

Age class

- NP Newly planted – a tree within 3 years after planting
- YM Young Mature – a tree within its first one third of life expectancy
- MA Middle-aged – a tree within its second third of life expectancy
- M Mature – a tree in its final one third of life expectancy
- OM Over Mature – a tree having reached its maximum life span and is declining in health and size due to old age
- V Veteran – a tree that is of interest biologically, aesthetically or culturally because of their age, size and condition

Physiological Condition

An assessment of the physiological condition (i.e. health/vitality) of the tree categorised into:

- GOOD a tree in a healthy condition with no significant signs or symptoms of ill health
- FAIR a tree generally in good health with some problems that can be remediated
- POOR a tree in poor health with significant problems that can't be remediated
- DEAD a tree without sufficient live material to sustain life

Structural Condition

An assessment of the structural/safe condition of the tree categorised into:

- GOOD a tree in a safe condition with no significant defects
- FAIR a tree in a safe condition at present but with defects or significant defects that can be remediated
- POOR a tree with significant defects requiring major tree works or felling to make safe
